The Company - ELO Digital Office GmbH

ELO Digital Office GmbH develops high-performance software that allows companies to take a holistic approach to managing information. The products and solutions that ELO Digital Office GmbH offers for electronic document management, digital archiving and workflow management cover all areas of Enterprise Content Management (ECM).

The solutions are tailored to suit individual requirements and companies of all sizes and are based on three standard product lines: **ELO**office is the entry-level solution for small businesses. The modular client/server framework of **ELO**professional is aimed at SMEs. The high-end solution **ELO**enterprise, designed for large companies and corporations, is platform-independent, highly scalable, as well as multi-client capable. **ELO** DMS Desktop integrates the functions of all three product lines seamlessly into Microsoft Office.

The Stuttgart-based company emerged as a spin-off from the Louis Leitz group of companies in 1998, two years after the **ELO** brand was established, and has since been headed by Karl Heinz Mosbach and Matthias Thiele. Thanks to its entrepreneurial vision and powerful products, ELO Digital Office GmbH is successful on the international stage and has offices in Europe, North and South America, Asia and Australia. In addition to the company headquarters in Stuttgart, the company has employees at branch offices in Dortmund, Hamburg and Gera.

ELO Digital Office GmbH supports workstations equipped with **ELO** products and solutions through its dense network of system partners. In addition, the company maintains numerous technological partnerships with software and hardware manufacturers such as Microsoft, SAP, and IBM, guaranteeing close ties to the marketplace for products and solutions.
